Complaint Summary:

Over the past two weeks, I have been receiving harassing and threatening messages on my Instagram account from an unknown user. The individual is using offensive language, spreading false rumors about me in comments, and sending manipulated images in direct messages. This behavior has caused me significant mental distress and affected my daily routine. Despite blocking the user multiple times, they continue to create new accounts to contact me. I believe this falls under cyberbullying and request urgent action to trace and stop the offender. I have attached screenshots of the messages and profile URLs as evidence.
